The Election Terminal — Datasheet

Compiled November 29, 2026 00:00 UTC.

This datasheet lists the data currently held by The Election Terminal as plain tables: election results and calendars, polling, voter registration and demographics, for the United States and each other country covered. It has no charts or maps; every table says what its columns mean and where the data comes from. Use the PDF's bookmarks panel to jump to a section. Figures are as last collected from each source and can change as counts and polls update; a dash means the source gave no value (never an estimate).

Contents: Part 1 — United States: election dates, race results by state, Senate class notes, polling (race, generic ballot, topic), voter registration, county demographics (ethnicity, age, education, socioeconomic), historical results. Part 2 — other countries: each country's election results and polling.

Part 1 — United States

Election calendar, race results, polling, voter registration and Census demographics for the 2026 U.S. cycle, by state (and by county where the data is county-level).

State	Election date	Local close	Time zone	Region	Notes
Vermont	2026-11-03	19:00	America/New_York	—	All Vermont polling places close at 7:00 p.m. by statute (17 V.S.A. section 2561, cited on the Vermont Secretary of State's own Election Day page); opening times vary by town (5-10am). The Green Papers' 2026 general table agrees (7:00p EST). NOTE: this CSV's own 2026-08-11 Vermont primary row says 20:00 -- that earlier row looks wrong against the same statute and should be reviewed.

West Virginia	2026-11-03	19:30	America/New_York	—	West Virginia polls are open 6:30 a.m. - 7:30 p.m. by statute (W. Va. Code section 3-1-31), confirmed consistently across 2012/2020/2024 Secretary of State statements and May 2026 primary coverage (wvpress.org). The Green Papers' 2026 general table lists 8:00p 'reportedly' for WV -- that conflicts with the statute, so the statutory 7:30 p.m. is used here.

U.S. races and statewide results

One row per candidate in each race: the race (state, office, district, primary/general, party), its status, and each candidate's latest statewide votes and share. Results come from each state's own official results feed or results website, ingested by the app's results providers (see app/services/*_client.py); 'Final' marks results a feed reports as complete. 'Reporting %' is the share reported on that source's own basis. Upcoming

races list candidates with no votes yet. County-level results are not reproduced here.
